

AZURE SERVICES

As a managed services provider, Noxent is a one-stop shop for all your cloud computing needs, including: servers, databases, e-mail, applications, and collaboration tools.

Azure solutions support all your business needs; business applications, analysis, big data, internet of things (IoT), e-commerce, digital marketing and mobility.

Noxent is your guide through the Azure ecosystem: we ensure that your cloud infrastructure is scalable with your current and future needs. We guarantee you operational continuity aligned with your business reality. As a partner, we are responsible for providing optimization, security, advanced monitoring, capacity management and technical support for your infrastructure.

Azure Cloud services offered by Noxent are ideal for:

- Deploying Office 365 services such as Exchange, Skype, and SharePoint Online
- Mobile Device Management solution
- Architecture and migrations planned in Azure
- Disaster Recovery (DR) and High Availability (HA) architecture with Azure Site Recovery
- Architecture, planning and implementation of the ExpressRoute link for high-speed connectivity to Azure
- Backup and archive of your system data with our Noxent Backup Online Service
- Office 365 data backup
- Data center migrations
- End-of-life plan for Windows Server 2003 and migration to Azure
- Rapid deployments
- Development and test environments
- Application migration

Advantages

- Maximize the value of Microsoft Azure with managed services from our Noxent Operations Center
- Monitoring and continuous optimization of the Azure environment
- Manage data policies to meet your organization's security and compliance requirements
- Managing performance and alerts
- Troubleshooting 24/7/365
- Group multiple Azure and Office 365 accounts on a single invoice.

Noxent brings a unique experience in the management of public, private and hybrid cloud environments, allowing you to customize the ideal solution for your organization
